- **Full-stack Developer Bootcamp, Udemy,** [Jan 2023]: Completed intensive bootcamp covering modern web development technologies.
- **IBM Front-End Developer Specialization, Coursera**, [Sep 2023]: Proficiency in front-end technologies and software engineering principles.

Projects

- **Flow Jobs Platform**

  Personal Project using Next.js 14 | https://flow-job.vercel.app/
  - Developed a responsive job search platform with dynamic title generation to enhance SEO.
  - Implemented Next.js 14 server actions for creating and querying job postings, demonstrating proficiency in server-side logic and API integration.
  - Enhanced user experience by integrating a search and filter feature, allowing users to efficiently locate job postings based on various criteria.

- **Portfolio Website**

  Personal Project using Next.js 14 and Framer Motion | https://ubaid-dev.vercel.app/
  - Designed and developed a personal portfolio website to showcase development projects and technical skills.

  - Utilized Framer Motion to add advanced animations, improving interactivity and visual appeal of the site.
